Subject: Re: FW: Problem 01314649 40mhz radio

As I have described below I just need permission to use my 40 MHz transmitter to sail my model boat at orlando for a week it is just a hand held transmitter the same as a 75MHz that is used in the US just on a different freq it is a

Hitec brand

Model Ranger 3FM sky

3 channel FM proportional transmitter with a standard receiver (HFS-04m1+)

I hope this helps you out

yours C D Cook

Mr. Cook

I am reviewing your application at this time. Please upload a description of your operations to your application. Also, I attempted to look online to find a reference to your equipment and was unsuccessful in finding the model you identify. Can you provide the technical specifications of your equipment or a website link? The US rules provide for remote control operations around 75 MHz. We are still investigating whether it will be feasible to grant your request.

Subject: RE: Problem 01314649 40MHz radio

I shall be attending the EC12 National Model Yacht Sailing Championships to be held at Walt Disney World Orlando from 31st Oct- Nov 6th.

I will be the only skipper from outside of the US and shall be representing the UK in the championships.

Residing in the UK my Radio set up for my yacht is on the 40mhz wave band and I understand that I cannot use this radio in the USA without a licence

And So I would like a temporary Licence to use my radio in the USA.

When I attended the 1mt nationals in Mystic Seaport with skippers from all over the world a temporary licence was granted to the American Model Yachting Association to cover all of the Radio set ups. But as I shall be the only skipper from outside of the US I need to have a licence issued to me .it will only be for the seven days of the event and I would agree to any conditions you would place on the issue.

I hope you will help me with this problem because if I am unable to use my setup I will not be able to compete on level terms with the USA.
