Subject: Request for Info - File # 0644-EX-ST-2015

---

Message:

- 1) This is a transmit frequency range, not discrete frequencies. The specific operations frequencies have not yet been determined.
- 2) The experimental vehicle in question will be strapped to hold-down points on the tarmac during all operational testing at this site. No actual altitude or radius will be traversed. This STA is intended to cover Avionics subsystem testing only including the transceiver.
