Subject: 0047-EX-CM-2021 pre-coordination data request

---

Message:

Ms. Nguyen:

Good morning - Hope all is well.

The modification application under File No. 0047-EX-CM-2021 was filed today for Station WD2XJW to reduce the frequencies on the license as follows:

- Modify the 810-825 MHz band to: 810-822 MHz
- Modify 1432-1500 MHz band to 1433-1500 MHz
- Modify the 1950-2050 MHz band to 1950-2020 MHz
- Modify the 2900-4200 MHz band to 2900-3640 MHz and 3710-4200 MHz

The application also updates the contract POC information.

When the modification was submitted, the ELS issued an automated request for AFTRCC coordination. See below under Ref. 60895.

However, because this modification application does not add any frequencies or make any technical changes that would increase interference potential, BAE Systems assumes that the company will not be required to complete AFTRCC coordination for the modification application.

BAE Systems will conduct AFTRCC pre-coordination when it files the license renewal application &ndash; which is likely to be filed in May.

Accordingly, if you do not agree with BAE Systems that AFTRCC coordination will not be required for this modification, please let us know. As discussed above, BAE Systems will conduct AFTRCC pre-coordination when it files the license renewal application.

Best regards,

Jeff Rummel  
Attorney for BAE Systems
