

**Exhibit 1**

Pursuant to the request of the FAA (during coordination as required by Special Condition 5), the instant Modification Application is being filed to effectuate the following frequency substitutions:

- For existing frequency 1040.350MHz:

BAE Systems requests that this frequency be replaced by **new frequency 1039 MHz** (new frequency was coordinated by FAA under NG T150061)

- For existing frequency 1195.095 MHz:

BAE Systems requests that this frequency be replaced by **new frequency of 1192 MHz** (new frequency was coordinated by FAA under NG T150062)

No other modifications to the license are requested.
