

From: Richard Ball

To: Leann Nguyen

Date: March 23, 2015

Subject: FCC File 0046-EX-RR-2015

Message:

Ms. Nguyen and Mr. Stowe:

Good afternoon.

On behalf of my client BAE Systems, and in reply to your recent inquiries, I have consulted with the company and have received the following confirmations:

- Re: Cell phone number for Mr. Richard (“Rick) Ball of BAE Systems (Litchfield, NH) - (603) 318-6913 – This cell number was inadvertently taken off-line due to an internal misunderstanding. I have now received confirmation that Mr. Ball’s cell phone is now operational once again and no further problems of this nature are anticipated.

- Re: Telephone number for BAE Systems Emergency Services Center phone number – (603) 885-3842. This number remains the appropriate back-up Stop Buzzer in the event that Mr. Ball’s cell phone is not within range during business hours or if there is an after-hours inquiry. Currently, efforts are being made internally to ensure that when a call is made to the Emergency Services Center for RF/Stop Buzzer issues, that such calls are correctly routed to appropriate POCs within the company. Once those efforts have been finalized, I will advise you at that time.

On behalf of BAE Systems, I apologize for any inconvenience you may have experienced when attempting to verify this information. If you ever experience any similar difficulties in the future, please feel free to contact me directly so I can communicate with the company and work to correct any issues.

Finally, it is my understanding that the instant inquiries as to the Stop Buzzer information relates to the company’s pending FCC application of BAE Systems under File No. 0046-EX-RR-2015 (Station WF2XAM) (Ref. 27132). If, however, your inquiries relate to any other pending FCC applications, please advise and I will ensure that this reply is associated with any such additional pending filings.

Best regards,

Jeff Rummel
Attorney for BAE Systems
