

Exhibit 1

This application seeks to modify the license for Station W12XTD as follows:

- Modify the existing band of 24.3995-24.4005 GHz to: 24.399-24.401 GHz
- Modify the existing band of 24.00 – 24.0005 GHz to: 24.00 – 24.05 GHz
- Add new band of: 24.05-24.25 GHz
- Add new band of: 24.650 – 24.700 GHz

Also, this is to confirm that – as specified in the original license application – the license is intended to authorize operations not only in support of the contract (W56KGU-15-C-0067) but ALSO for Internal Research and Development.

Accordingly, because the license supports both contract and IR&D activity, it is requested that Special Condition 5 be removed from the license.
