

Explanation of Amendment

In order to avoid the band 322-328.6 MHz, the application has been amended to:

(1)

- Delete the frequency 326 MHz

and

- Add as suggested alternates the frequencies 316 MHz **or** 321 MHz. BAE Systems can accept either of these frequencies as a replacement for 326 MHz, whichever is preferred by NTIA and the Commission.

(2)

- Delete the frequency 324 MHz

and

- Add as an alternate the frequency 319 MHz
