Message:

Ms. Nguyen:

Re: FAA Coordination

- This is to advise you that BAE Systems is working closely with FAA regarding the FAA coordination that is required for this pending modification application.
- Pursuant to our discussions with FAA, this email requests additional time to complete coordination – until March 6.
- BAE Systems hopes to complete FAA coordination prior to that time, and we will advise the Commission as soon as FAA coordination is completed.
- In the meantime, BAE Systems requests additional time – until March 6, to complete FAA coordination.

Re: MAG Coordination

- Pursuant to the email exchange below with you, BAE Systems's understanding is that the company is not required to contact the MAG directly to obtain coordination.
- The contracts being supported by this experiment were listed in the company's “Reply to Correspondence” dated 12/30.
- Accordingly, BAE Systems assumes that no further action is necessary regarding the request for “MAG approval” – but please advise asap if this is incorrect.

Best regards,

Jeff Rummel
Attorney for BAE Systems

Subject: RE: Question re: MAG Coordination - Ref. 59375 - Pending File No. 0283-EX-CM-2020

Mr. Rummel,
Please hold the requirement below. I will let you know if I receive the coordinators's response. But I need NG T numbers for each FAA frequencies because these frequencies are rejected.

Thanks,

Leann Nguyen

Subject: Question re: MAG Coordination - Ref. 59375 - Pending File No. 0283-EX-CM-2020

Ms. Nguyen:

Good afternoon.

In the ELS message below, BAE Systems is asked to "provide MAG approval for each MAG frequencies".

Please advise if you want BAE Systems to contact MAG directly and request coordination? It is BAE Systems' understanding that generally applicants are not asked to contact MAG directly for coordination.

Best regards,

Jeff Rummel
Attorney for BAE Systems
