Subject: 0323-EX-CR-2021 pre-coordination data request

Message:

Ms. Nguyen:

With respect to the AFTRCC coordination inquiry issued under Ref. 62154 (see below) – the only frequencies on the license which are subject to AFTRCC coordination are 2360-2364 MHz.

In that regard:

- As confirmed in my email below from June 2019 for the prior renewal, BAE Systems still has no current plans to utilize the range of 2360-2364 MHz, and therefore will not be completing AFTRCC coordination.

- Accordingly, BAE Systems assumes that AFTRCC coordination still will not be required unless and until the company requires operation within 2360-2364 MHz.

Please advise if anything further is required from BAE Systems in light of the fact that the company has no plans to utilize the range of 2360-2364 MHz, and therefore will not be completing AFTRCC coordination.

Best regards,

Jeff Rummel
Attorney for BAE Systems
