

**Explanation of Amendment**

In response to the comment of the Commission staff with respect to concerns of NTIA within 322-328.6 MHz, the application has been amended to:

- Delete the frequency 326 MHz

and

- Add as suggested alternates the frequencies 316 MHz **or** 321 MHz. BAE Systems can accept either of these frequencies as a replacement for 326 MHz, whichever is preferred by NTIA and the Commission.
