Subject LICENSE RENEWAL

Dan,

We have submitted a renewal for our license supporting our outdoor antenna test range in Auburn. The license is attached. This license supports testing and certification of antennas used on various aircraft, both commercial and military derivative. We have been conducting this testing for a number of years, with no issues being reported. The testing is all low power, using signal generators a transmitter source. The maximum ERP is 8 mW. We request the FAA concurrence with the license renewal.

Your assistance is appreciated.

Sincerely,  
Ron Center
