Subject: FCC File# 0275-EX-RR-2009

---

Message:

In response to your inquiry, we have attached the additional FAA coordination for the band 2700 - 3000 MHz. However due to other government operations the FAA has limited operations in that segment as follows:

2716 - 2734 MHz	FAA Coordination # NG T100059
2761 - 2774 MHz	FAA Coordination # NG T100060
2889 - 2891 MHz	FAA Coordination # NG T100061
2916 - 3000 MHz	FAA Coordination # NG T100062

Since this is a renewal application we are unable to make any changes to the frequency bands listed in the current application, but we are able to notch out the appropriate areas.

With respect to the other items listed in this inquiry, the FSS coordination was completed and the associated COMSEARCH documentation has been attached to the application file. In addition the the Stop Buzzer POC for this operation is:

Peter Maroon, Cellular: 253-212-5018

Thanks,
