Attention: Wholesale Lockbox Shift Supervisor

Dear Sir:

Please find attached our application and fee for stated frequencies in exhibit 1. We have a requirement for the use of these frequencies starting on December 1, 1997, in connection with our unmanned air vehicle system. We have verified locally with U.S. Army post Ft. Fill's Director, Plans, Training, and Mobilization, that the frequency requested is not an interference with air traffic or range operations.

Ground testing is conducted at our facility east of interstate 44 in Lawton. Flight operations are conducted at Ft. Sill on the south side of the west range. From our southern location, flight operations are conducted in a fan north of our launch site usually within 10KM radius.

If you have questions, please contact Roy Remington or me at the above numbers.

Thank you.

Sincerely,

Leigh E. Stevens
Manager
