Message:

Please disregard the Link Budget Calculation (LBC). It was a sample sheet provided by the manufacturer, which I mistakenly thought was necessary information. But, it was not. So, how do I find out the ERP value? I'm an Avionics Tech, I don't deal with this stuff. I just want to get a repeater, so I can test aircraft in my hangar. Clearly the signals we're dealing with don't radiate through the hangar walls and roof. If they did, the signal would pass through the roof, and I wouldn't be requesting a repeater. So how do I calculate this?
