Message:

Leann,

For testing under frequency file number 0317-EX-PL-2011, there is no Stop Buzzer since the aircraft will always have an onboard pilot in direct control of the aircraft. Regarding the bandwidth, my misunderstanding, I was trying to indicate on the form a center frequency of 2282.5 MHz with an emission designator of 3M50F1D. Please open the band limits to 2279 MHz and 2286 MHz with the intended center frequency being 2282.5 MHz. Also, 2282.5 is our preferred frequency; however, we can easily tune to any frequency within the 2200 to 2300 range should you need to move us in order to grant his request.

Thank you,

Mark Stoufflet
