Request for Five-Year License Term

In addition, Bigelow Aerospace is operating its experimental facilities as part of a program to develop a private sector owned and operated space station, primarily to conduct microgravity related research, development and manufacturing for both scientific and commercial applications. This is an inherently long-term development project that will not be completed within the standard two-year license term. In keeping with the nature of the project and for the sake of administrative efficiency, Bigelow Aerospace therefore requests a five year license term for its renewed authorization consistent with Section 5.71(a) of the Commission's Rules. See 47 C.F.R. §5.71(a).
