

AMENDED RESPONSES

Bigelow Development Aerospace Division, LLC (“Bigelow Aerospace” or “BA”) hereby amends its application as follows:

Question 10: Manufacturer

BA originally specified a particular transmitter as its intended equipment for X-band use. As indicated by its February 14, 2007 request for expedited action, however, BA has not yet chosen an equipment provider for its transmitting equipment, and requires near-term action on its application to facilitate the process of selecting an appropriate vendor. Accordingly, BA amends its application by deleting the original response to Question 10. The response should be changed to “Not Yet Selected.” Proposed operating parameters for the X-band equipment remain unchanged.

Question 16: Contact Information

The telephone number for BA’s North Las Vegas facility is corrected to: (702) 639-4440. Dan Cohen, the Program Manager for this project, is added also as an additional contact person.
