

Global 1-4 Constellation Private Remote Sensing Space System

On August 28, 2017, the Commercial Remote Sensing Regulatory Affairs Office of the National Oceanic and Atmospheric Administration, an agency of the Department of Commerce, granted a license to BlackSky Global, LLC to operate the first phase of the Global Constellation, satellites 1-4, a private, commercial, space-based, remote sensing system (the "Global Constellation").

These first four satellites, which make up the initial phase of the Global Constellation, are licensed to collect images of the Earth and will operate in circular orbits with altitudes ranging from 500-575 km and inclinations near 97 degrees. The first phase will be followed by additional launches, culminating in the planned constellation of sixty satellites total, operating in mid-inclination and sun-synchronized orbits and at altitudes near 500 km.
