The RAVAN spacecraft was launched on November 11, 2016. The RAVAN spacecraft was deployed from its dispenser at 20:56:25.940 GMT on 11/11/16. Mission operations have commenced using the BCT ground station as specified in our granted licenses, WI2XLS and WJ9XVC. These operations include UHF transmission from the BCT ground station, UHF transmission from the RAVAN satellite and Globalstar transmission from the RAVAN spacecraft.

Best Regards,
