Importance: High

Mr. Kennedy,

I have 49 110' US Coast Guard Cutters to convert into 123' cutters. It is approximately a seven year project, and when I started this application process I called the FCC to ask questions. I understand renewing a licensee, but no where was 6 months discussed with me. That being said, I need the license to start 11/15/03 and go fore 6 months.

Will I have to pay additional fees every 6 months?

Mr. Dicken,

Would you also like to change the "Start Date" of October 1, 2003 and the "End Date" of December 31, 2003? Please note that if you decide to amend the dates, the maximum length of time for an STA is six months.

Mr. Kennedy,

You are authorized to amend my application and revise the bandwidths for 146-174 MHz and 403-433MHz to read 12.5 KHz. Please continue the processing of the application with these revisions.

Subject: RE: STA File Number 0352-EX-ST-2003; STA Confirmation Number EL13641

Mr. Kennedy,

The 146-174 MHz frequency will operate in a channel bandwidth of 12.5/30 KHz. The designators that I have been provided with are F1D, F2D, F1E, and F3E for this equipment and bandwidth of 12.5 KHz/30 KHz.

The revised location is satisfactory.

I request you amend my application to reflect the changes above.

Mr. Dicken,

I would think that you still need some type of license to operate in the 146-174 MHz band, therefore, I will still need the three emission symbols from you to make the 25K0 complete. Also, I have made the location "Within 12 miles of Grand Isle, Louisiana, within 19.6 km, centered around NL 29-16-00; WL 89-57-24", was this what you intended as you area of operations?

Mr. Kennedy -

Here are updates to the subject application:

Location: Revise to Grand Isle, Louisiana; 29:16:0 N ; 89:57:24 W

Frequency Band	Partial design
Comment	
30-88 MHz	25K0
No longer in plan; Delete this requirement	
136-162 MHz	12K5
No longer in plan; Delete this requirement	
155-163.725 MHz	25K0
No longer in plan; Delete this requirement	
156.025-159.175	25K0
Revised to read 16K0G3E / F1D	
450-470 MHz	25K0
Revised to 11K0F3E / 16K0F3E	

For the frequency band 146-174 MHz the equipment has an FCC type approval for 50-100W PER PART 90.213. TYPE Acceptance Certificate AZ492FT3773. Can this type acceptance be used and this frequency deleted from the application.

The USCG has a valid license for most of the frequencies in the application, and I've heard that we need to request use of these frequencies from the FCC, and then the FCC would request authority from the USCG. Is this correct, and what's the process to request this frequency use authorization? I have attached our frequency plan for your information & use.

John Kennedy is authorized to amend the subject application with the changes included herein.

Best Regards,
 Bill Dicken
