FCC File #: 0352-EX-ST-2003

---

Message:

Dear Mr. Kennedy:

All equipment channel bandwidths have been limited to less than 12.5 KHz, the lower bandwidths will not effect the operational effectiveness of the equipment. These bandwidths have been amended in the outstanding application, FCC File #: 0352-EX-ST-2003.

The issues in item 4 of your letter have been addressed by narrowing operational bandwidth as stated above and recognizing that the 2.4 - 2.5 Ghz issue will be tested as sold, ie the transmitted power will be low enough to be excluded by FCC Part 15. The remaining frequencies concern INMARSAT that the INMARSAT provider is licensed to sell air time in accordance with the appropriate federal regulations.

Any further technical concerns please contact Ms. Valerie Kelly at 609-304-1632.
