

Eligibility Statement

Booz Allen Hamilton is eligible under Part 5 subpart E of the Commission Rules as both a research facility and an integrator of wireless communications systems. Booz Allen holds numerous contracts with the federal government and others to conduct research and development of existing, emerging, and novel wireless communications technologies. Booz Allen is also contracted by the federal government and others to perform factory and field staging and integration, acceptance testing, interference mitigation, and other technical and engineering tasks on wireless technologies.

Booz Allen operates an RF laboratory equipped with RF test equipment and has decades of experience and numerous qualified engineers able to responsibly operate experimental RF systems.
