**STA Application**  
**0218-EX-ST-2016**  
**Narrative Explanation of Operation**  
**Indianapolis 500 Automobile Race**  
**Indianapolis Motor Speedway, Indianapolis, Indiana**  
**May 10, 2016 through May 30, 2016**

This application proposes the use of the band 2200-2290 MHz for short-range video relay in connection with video production by the applicant of the Indianapolis 500 Race to be held at the Indianapolis Motor Speedway, Indianapolis, Indiana. The race is to occur on Sunday, May 29, 2016 but the installation of equipment and the ability to televise practice sessions and qualification runs necessitates the request for Special Temporary Authority to commence on May 10, 2016 and to conclude the day after the race, May 30, 2016. includes setup and testing prior to the event. This is a major automobile racing event televised worldwide, and all normal channels for video production are in use.

Specifically, the use to be made in this band is for short-range RF cameras and in particular a rail camera mounted trackside that will permit video transmission of the cars on the track on a moving platform.

Should any authorized entity using this band report interference during the proposed operations, operation on the offending channel will immediately cease and not resume unless and until the interference complaint is resolved to the satisfaction of the authorized user. The applicant will also coordinate with the volunteer frequency coordinator for the Indianapolis Motor Speedway, Mr. David Fort.

Other licensed channels normally used for video production in this frequency range pursuant to BAS and LTTS licenses are not available for this event due to their use by the Applicant and by other licensees and authorized services at this same event and in the City of Indianapolis.

**The stop buzzer contact for this operation is Mr. Doug Parr who can be reached at 443-994-1690 or by e-mail at Doug.Parr@bsintl.com.** Other communications can be directed to the office of counsel for Broadcast Sports, Inc:
