RE: Application 0080-EX-CN-2020

Dear Sir or Madam:

The State of California (State) is requesting a experimental authorization for a GOES Satellite transmitter located at the Sacramento River-Snodgrass Telemetry site in Sacramento County California. The telemetry site is part of a larger system operated by the State which includes but is not limited to WA2XAJ, WC2XOB, and WI2XDU. The purpose of the site is to monitor water level, water temperature, wind speed, and other data for the area. The data is transmitted to the GOES satellite and is collected by the State's Department of Water Resources.

If you have any questions, please contact John Lemmon, Senior Telecommunications Engineer at (916) 657-6153 or by e-mail at john.lemmon@caloes.ca.gov.

Sincerely,

JOHN LEMMON
Senior Telecommunications Engineer
