Subject: Additional Information Request

Message:

- 1) Provide a detailed description of your experiment. The information you have provided seems vague. What is this downlink used for?
- 2) 2200-2290 MHz is a heavily congested federal band. Request the frequency band that you absolutely need for your experiment.
- 3) The requested Bandwidth (100 MHz) is more than the Start and Stop frequency in your application (2194-2282 MHz). Correct this and provide the maximum bandwidth of the signal itself that you will be transmitting.
- 4) Provide a detailed explanation of the letter X in emission "FXW". Would any other emission better describe your experiment?
- 5) Change the Start Date to at least 15 days from the day you respond and address all the above questions.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of March 31, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
