Federal Communications Commission

Form 442

#10

- a. The primary project objective is to develop and demonstrate advanced maritime computer applications operating through an INMARSAT Standard C Terminal for existing and potential users.
- b. This project seeks to enhance the utility of Standard C Terminals by increasing the spectrum of available user services.
- c. The increased utility of Standard C Terminals will, consequently, heighten utilization by current users, as well as initiate new utilization by attracting new users.
