

Supporting Documentation

CP Communications has a urgent need to add TV Channel 17, 488 – 494 MHz, to our frequency needs due to some unexpected demands on spectrum requirements for the US Woman's Open Golf Event for which we already have an STA granted, 0665-EX-ST-2017, that couldn't be amended. We understand that the time frame to operational dates is extremely close and respectfully request expedited granting of this request.
