STA Application 1838-EX-ST-2020
Frequency Coordination Explanation for 600MHz and 700MHz Request
January 27, 2021 – February 23, 2021

This application proposes the use of unused 600 and 700MHz spectrum for wireless microphone equipment in support of the televised broadcast and internet streamed coverage of the National Football League (NFL) Super Bowl LIV and related events/activities in and around the greater Tampa / St. Petersburg area.

Applicant is a television microwave and communications production company which provides video, audio and communications equipment and services for broadcast, satellite broadcast and cablecast of sporting and other events. Applicant has certain LTTS, BAS and private wireless licenses for this purpose. However, the extensive Part 74(H) spectrum utilization at the various venues by numerous production and broadcast elements necessitates making coordinated temporary use of additional spectrum in unused portions of the 600 and 700MHz bands for LPAS operations. The proposed spectrum consists of;

600MHz Block A;	617-622 / 663-668 MHz
600MHz Block G;	647-652 / 693-698 MHz
600MHz Guard bands;	616-617 / 652-653 MHz
Upper 700MHz Block A;	757-758 / 787-788 MHz
Upper 700MHz Block B;	775-776 MHz

Additionally, applicant seeks to use a higher transmit power level, 50mW ERP, in 614-616 MHz and the 652-663 MHz duplex gap as there is no active adjacent services in 600MHz A and G blocks. This will ensure sufficient performance about a large outdoor service area without causing interference. Antenna heights will be below 2m AGL.

All 600 MHz and 700 MHz licensees of the proposed bands within the proposed area of operations and extending 10km beyond are being contacted in an attempt to obtain consent prior to operations.

To mitigate potential interference to adjacent channel licensees, occupied channel bandwidth will not exceed requested band limits.

Providing solutions for audio and video communications

As it regards the requested expiration date, although Super Bowl LIV is tentatively scheduled to be held February 07, 2021, there is a possibility of postponement until as late as February 21, 2021, with at least a few related activities continuing through the 22nd. The requested expiration date provides for this possibility.

**** Stop-buzzer contact for the duration of operations will be:**

**Michael Mason
