Re: ITU Cost Recovery

Dear Sir or Madam:

On _____, 2021, the CalTech High-Speed Integrated Circuits Group (CHIC) filed an experimental license application with the FCC's Office of Engineering and Technology for its MAPLE system to be a hosted payload on a Momentus Vigoride satellite. CHIC is requesting that the FCC submit to the International Telecommunications Union the appropriate API and pre-publication notices that are part of ITU coordination for the proposed operations. CHIC will complete and submit its SpaceCap filing, and this letter will accompany that submission to the FCC.

CHIC unconditionally accepts all cost recovery responsibilities associated with the ITU filings for its MAPLE hosted payload. Please address all correspondence related to the ITU obligation to:

Austin Fikes
CalTech
