Subject: Additional Information Request

---

Message:

Following careful consideration, GeoLinks believes the most expeditious course toward conducting its experimental testing program in the near future, as planned, is to withdraw its request for transmit authority in the 3700-3800 MHz band and continue seeking authority to use only the lower band originally sought at 3300-3550 MHz. Accordingly, it hereby withdraws its request to use the 3700-3800 MHz band.
