

To all concerned:

IRVINE01 was launched November 11, 2018 aboard an Electron launch vehicle, and IRVINE02 was launched December 3rd, 2018 aboard a Falcon 9 launch vehicle.

As of October 8th 2019, both spacecraft (IRVINE01 and IRVINE02) are officially considered inoperable. After months of attempting to recover the two spacecraft, efforts have ceased.
