Subject: Additional Information Request

## Message:

The experiment exhibit states "The Capella Satellite will utilize the 9300-9900 MHz frequency range for SAR imaging"

The form 442 also has 9600 with 600 MHz and I also sent coordination for that particular request.

The new NOAA letter that you submitted has 9.65 GHz with 600 MHz bandwidth. Please have this NOAA exhibit updated to show 9.60 GHz with 600 MHz bandwidth to match 442.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 18, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
