Behnam:

In response to your e-mail to Ken Oyadomari of April 1, 2019, the height of each antenna above ground level (AGL) and the ground level with respect to mean sea level (MSL) are as follows:

Haras Developments, Dublin, OH: 9.8m AGL and 288.3m MSL

Maris Developments, Boardman, OR: 9.8m AGL and 96.9m MSL

If you have any questions or need any further information, please let us know.

Best regards,

Bill Wiltshire
