12/21/2016

Anthony Serafini,

Thank you for taking the time to review our application for the STA to operate our Managed Access System (MAS) at Telfair State Prison to prevent the use of contraband cell phones. I would like to take the time to explain our efforts in establishing service agreements with the local wireless carriers in the area.

We have been working with three carriers (AT&T, T-Mobile and Verizon) in the area for the past year to establish long term lease agreements. We have successfully entered into a Long Term de facto lease with AT&T as of 9/24/2016.

We submitted a final draft lease proposal to Verizon for their review and approval on 12/07/2016. We are hopeful that an executed lease will be issued soon and they verified the document is within Regulatory and Legal Department.

We have reached out to T-Mobile requesting their Long Term De facto lease template for us to submit. Unfortunately after multiple attempts we have not received any response from T-Mobile about our request. Thus far, they have responded by continuing to provide consent letters to allow us to operate through the expiration of the STA.

If you would like to reach out to our current contacts at T-Mobile they are:

Trey Jackson

Senior Analyst, Government Affairs

202-654-5905

[Arthur.jackson@t-mobile.com](mailto:Arthur.jackson@t-mobile.com)

Ken Loder

[Ken.loder@t-mobile.com](mailto:Ken.loder@t-mobile.com)

You also requested a progress report of our testing and the need to continue testing. Our MAS system is fully operational and has been accepted by the Georgia Department of Corrections (DOC).

We really appreciate your assistance and will gladly provide any information you need or answer any questions you may have. Please let me know if you would like to get together on a conference call discuss any questions or concerns you may have.

Best regards,

Larry McKellop
