Subject: Additional Information Request

Message:

I have updated the application for the maximum 6 month license.

Regarding the coordination with the FAA, we ran across this issue with the original issuance of this license. Refer to confirmation number: EL857995 and communication reference 52262 and response.

"Regarding FAA coordination document requested, since the emissions from the transponder are not experimental, FAA Spectrum Engineering indicated that coordination was not required through them and returned the frequency coordination request without action."

Naturally, we will continue to coordinate with local ARTCC during our testing per the special conditions listed on our existing license.

Best Regards,
Grant Lichtsinn
