Subject: Clarification for Cisco STA in 3.5 GHz band

Dear Mr Young,

This concerns the following application for experimental license:

STA File Number: 0521-EX-ST-2000

Form STA Confirmation Number: EL10480

1. Please remove the request for confidentiality.
2. Clarification of purpose of STA application: The 3.5 GHz radio system being developed is for use outside the United States. In order to determine and demonstrate performance parameters, it is necessary to establish over the air links in a typical point to multipoint network. This developmental work would be more efficiently performed in the US near the manufacturer's location, rather than establishing a network in one of the countries to which he will be selling the product. Therefore, Cisco requests an experimental license be issued for this purpose.

I hope this clarifies the outstanding application items and that you will be able to issue this license. If you have questions or need further information, please don't hesitate to contact me.

Best regards

Tom Cokenias
