## Request for Experimental license

Cisco Systems has three vehicles that are being specially equipped with mobile land radios for both demonstration purposes at various trade shows as well as to provide emergency disaster communication services when loaned out to various emergency response providers in times of crisis.

At the trade show scenario, the radios would be operated within the requirements of Part 5 of the rules under Cisco operation. All frequency coordination done by Cisco in this case

In emergency operations, the radios will be operated under the control of the emergency provider. The manufacturers will be responsible for addressing the certification issues for their products per FCC regulations.
