

Exhibit – US-33 Smart Mobility Project Partners (Multiple FCC Experimental License Requests)

The US-33 Smart Mobility Project is a collaborative effort with multiple project partners with combined interest in pursuing the testing of connected and automated vehicles and other smart mobility initiatives. To allow the testing to proceed FCC Experimental License Requests have been submitted by three project partners as described below:

Ohio Department of Transportation: **FCC Form 442 File Number - 0952-EX-CN-2020**

City of Marysville: **FCC Form 442 File Number - 0150-EX-CN-2021**

City of Dublin: **FCC Form 442 File Number - 0153-EX-CN-2021**

We ask that all three of these experimental license requests be processed/reviewed together as all three are part of the overall US-33 Smart Mobility Corridor Project which is partially funded through a USDOT ATCMTD Grant.
