Subject: FAA Coordination Required

Message:

Mr. Sangani:

In connection with pending File No. 0054-EX-CM-2020, this is to advise you that FAA coordination of the pending modification for Station WE2XDA remains ongoing.

FAA's Rodney Murphy is cc'd on this email at his suggestion.

FAA and Cobham are currently discussing specific technical issues in an effort to complete coordination.

An additional 15 days – until June 15 - is requested to complete FAA coordination.

Finally – As previously explained, although Cobham was hopeful that FAA coordination and Commission grant of the modification application (0054-EX-CM-2020) could occur before the expiration of the WE2XDA license on June 1, Cobham will be filing a renewal application for WE2XDA at the end of this week to ensure that a renewal application is filed before expiration.

Best regards,

Jeff Rummel

Attorney for Cobham Advanced Electronic Solutions Inc.
