

June 4, 2019

To Whom It May Concern:

This is to certify that Coho Communications deploys and/or manages radio frequency equipment.

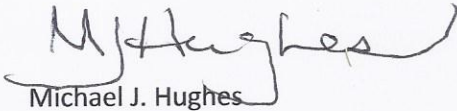

The RF experimentation will be conducted by following a strict Test Plan defined and approved by Coho Communications in a controlled environment.

Coho Communications will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

Coho Communications has extensive RF experience and expertise deploying RF networks and has a number of RF engineers on permanent staff.

For the above reasons, I believe Coho Communications meets the Eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

Michael J. Hughes

Owner

Coho Communications
