

The Colorado Space Grant Consortium is an educational organization.

The COSGC is funded by NASA and is a state-wide organization involving 13 colleges, universities and institutions around Colorado. Our organization provides Colorado students access to space through innovative courses, real-world hands-on telescope and satellite programs, and interactive outreach programs.

Our students interact with engineers and scientists from NASA and aerospace companies to develop, test, and fly new space technologies and to support our outreach and teaching programs.
