Request for Info - STA File # 0040-EX-ST-2002- Reply

Message:

Mr. Young:

The MMDS/ITFS spectrum in the Washington DC Area is controlled by WorldCom. Currently the E channels are not being used. Worldcom has coordinated an agreement with their clients using the D and F adjacent channels to let Saraband use Channel E2 (2608-2614 MHz). I will forward to you any emails or letters that I receive. If you have any questions please call or email.

regards,

Ken Ryan, Comsearch
