Subject: Additional Information Request

Message:

1) Leave the original emission 14M0G1D the way it way in your application. Please add another line to each frequency with the new emission 25M0G1D. Don't change the data since that's the way it was approved in GMF. Also add new information such as a new location, new frequency or new emission.

2) You're requesting 25 MHz with a center frequency of 4930 MHz. That puts you in the public safety frequency bands.

The frequency band 4940-4990 MHz is allocated for public safety. According to 47C.F.R.§5.85(d), "Applicants in the Experimental Radio Service shall avoid use of public safety frequencies identified in part 90 of this chapter except when a compelling showing is made that use of such frequencies is in the public interest. If an experimental license to use public safety radio frequencies is granted, the authorization will include a condition requiring the experimental licensee to coordinate the operation with the appropriate frequency coordinator or all of the public safety licensees using the frequencies in question in the experimenter's proposed area of operation." Submit an exhibit showing a compelling reason to use public safety frequencies and affirm that you will coordinate with the appropriate frequency coordinator or all of the public safety licensees using the frequencies in question in your proposed areas of operation.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 11, 2021 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
