Mr. Pereira

We will need additional material for your application. Please upload the following exhibits.

1. Description of your satellite and experiment
2. Orbital Debris Assessment report
3. ITU spacecap evaluation database file that you will need to email to me directly. Rename the extension to .txt or our email will block the file.
4. ITU notification letter and cost recovery letters. Copies are attached for reference
5. NTIA technical parameters for the satellite and ground station parameters. A guide document is attached.
6. If your satellite has an imaging use, then you will need to seek a NOAA license for that as well
7. If you are using amateur frequencies, you will need to coordinate with the ITU IARU organization also.

Regards
Tony Serafini
