

# The International Amateur Radio Union

Since 1925, the Federation of National Amateur Radio Societies  
Representing the Interests of Two-Way Amateur Radio Communication

**KickSat -2**  
**Zachary Manchester**

**6 November 2015**

Dear Zac

Further to our Email exchange I have added the second frequency. Coordination is now as follows. I am suggesting 437,240 MHz for the downlink of the kick sat bus as there are currently no downlinks coordinated on the frequency.

KickSat bus Up and downlink	437,240 MHz	1 W
Sprite Downlink	437,505 MHz	10mW

You have indicated a launch will be in 2016 please advise us of final date for the launch when this becomes available and also what other satellites using amateur frequencies are on the same launch vehicle.

Please note that all frequencies in the amateur satellite service are shared frequencies. We have attempted to make the best possible selection for your project.

You are also referred to the ITU requirements for satellites. We have prepared an easy reference document which is available on [www.iaru.org/satellite](http://www.iaru.org/satellite), it will assist you to comply with the ITU requirements for Amateur satellites. Please advise us of the API number once available.

Please also read the "controlling satellites" document available on [www.iaru.org/satellite](http://www.iaru.org/satellite)

Best wishes for a successful project.

Please keep us informed of developments and progress.
