

Reason for Extension for Cornell ALPHA STA

Cornell ALPHA is currently licensed under STA 1984-EX-ST-2019. It expires January 31, 2021.

The launch has been delayed and is currently scheduled for May 12, 2021. Therefore an extension of the STA is requested, so that the mission will have a valid STA at the time of launch.

No other parameters of the mission are changing. It is still an ISS deploy, with the same radio characteristics, and the same Administrative data.
