RE: NOAA Commercial Remote Sensing Regulatory Affairs License Inquiry

Dear Dr. Peck:

The National Oceanic and Atmospheric Administration (NOAA) Commercial Remote Sensing Regulatory Affairs Office (CRSRA) has received and reviewed your Initial Contact Form submitted on December 31, 2018. By the authority given to the U.S. Secretary of Commerce under the National and Commercial Space Programs Act of 2010 (P.L. 111-314), and as delegated to NOAA, we have assessed that your proposed mission will not be required to apply for a NOAA operator's license. This determination was made based on the information provided that the satellite system has no Earth-sensing capability. This does not relieve you of the obligation to receive any other U.S. Government licenses, permissions or permits.

This applies to the PAN A and B mission only, and is based on the Initial Contact Form that was submitted on December 31, 2018. If the factual circumstances of the information provided change, please resubmit your Initial Contact Form. Additionally, please contact CRSRA with any future satellite missions you may plan to operate to obtain a licensing determination on that specific mission.

Sincerely,

A handwritten signature in blue ink, appearing to read "Tahara D. Dawkins", written over a horizontal line.

Tahara D. Dawkins
Director, Commercial Remote Sensing
Regulatory Affairs
