To Whom It May Concern

This is to certify that:

Cradlepoint manufactures, deploys and manages radio frequency equipment. We are the world-wide leader in cellular gateways that use 4G-LTE as an enterprise WAN.

The RF experimentation will be conducted by following a strict Test Plan defined and approved by Cradlepoint in a controlled environment.

Cradlepoint will have a Project Manager in place to specifically follow the Test Plan, track results, and publish test results.

Cradlepoint has extensive RF experience and expertise deploying RF networks and has a number of RF engineers on permanent staff.

Cradlepoint's products have been utilized by other major companies for CBRS testing over the past year under various STAs obtained by those companies to operate in the CBRS space (Band 42, 43, 48).

For the above reasons, I believe Cradlepoint meets the eligibility criteria for a Special Temporary Authority experimental license as set forth in the Commission Rules.

Sincerely,

A handwritten signature in blue ink, appearing to read "Ken Hosac", is written over a light blue circular stamp.

Ken Hosac
Vice President, IoT Strategy & Business Development
