Hey Tony,

I apologize on the delay, but wanted to confirm my responses with co-workers. Thank you very much for your estimation for the time to process an application.

To answer your questions I've broken them up below:

1. Modifications or changes for 0237:
Modulation (add fast chirp modulation for 0237 radar)
Output Power
Appearance

2. 4 models

This is correct, there will be 4 models

3. 50 units per model

This is correct, 50 units per model at a total of 200 units.

Let me know if you have any other questions.

Thank you,

Matthew Gesch (マシュー)

Hello Matthew

Generally speaking we tell people it can take 45 days to process an application. The times can vary depending on the incoming workload and if there are any questions on applications that might need coordination with NTIA.

Please verify the mods on 0237. Are you just asking for 50 units per model? Is it 4 models and 200 total units?

Regards,
Tony

Subject: Application Time Frames for Future Reference

Good afternoon Anthony,

I originally contacted Nancy to find out the status of our radar (0237-EX-ML-2015), but she said it currently had a pending status. I would like to know about how long we should estimate for approval of radar applications for future reference in the 24 Ghz, 77 Ghz and 79 Ghz bands, so we can better schedule radar evaluations. Is there anything we can do to decrease the time to be approved by the FCC?

Thank you for your time and have a fantastic Thanksgiving,
Matthew Gesch (マシュー)
