Message:

Pursuant to the email date March 20, 2009, DOCOMO PACIFIC, Inc. (?DOCOMO?) hereby provides the additional information regarding DOCOMO?s request for an Experimental STA:

(1)   Locations: DOCOMO will conduct testing at the following two (2) locations -- 13-19-23.3N; 144-40-22.3E and 13-23-21.0N; 144-46-16.0/E

(2)   ERP Powers ? 100W ERP Peak

(3)   Emission designators - 5M00F9W (Noted: 5M00 = 5Mhz; F9W = CDMA; Together = WCDMA)

(4)   Modulating signals - QAM. (QPSK is a subset of QAM's)

(5)   Necessary bandwidths and tolerances ? The bandwidths are already specified in Emission designator. There is no need for tolerances (center freqency derivation in ppm) since this is a repeater. The Equipment class should be :Amplifier, Note: Repeater.
